Section 1

Dog Shelter Adoption System

Features/Abstract:

The Dog Shelter Adoption System is a role-based management platform designed to streamline the process of pet adoption within a shelter. It provides secure and organized access for administrators, givers, and adopters, ensuring efficient handling of pet records, adoption requests, and approvals.

- **Role-Based Access Control -** separate access for Admin, Giver, and Adopter.
- **Pet Management -**add, edit, and update pet information and status.
- **Adoption Management -** adopters can request adoption; admins approve or reject.
- **User Management -** registration and role assignment for all users.
- **Status Tracking** - manage adoption statuses (Available, Pending, Adopted).

Entities

- **Users**
  - *users_id(PK), user_name, email, role, status, password*
